JANVI NANKANI

Ahmedabad, Gujarat, India | Email | LinkedIn | GitHub

PROFESSIONAL SUMMARY

BCA student with hands-on Python development experience from a developer internship, full-stack project work in React, TypeScript, Node.js and Prisma, and ongoing learning in AI, Machine Learning and Generative AI. Second-place team at an internal Smart India Hackathon, research poster presenter at an international conference, and team leader for the Smart Yatri project at LJ Innovation Village 2026.

EDUCATION

Bachelor of Computer Applications (BCA)
LJ College of Computer Applications, Ahmedabad | 2024 – 2027 (Expected) | SGPA: 9.18 (Semester 1), 8.36 (Semester 4) | Reported 27th rank, Gujarat University

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, HTML, CSS
Frontend / Web: React, Vite, Tailwind CSS, React Query, React Hook Form, Zod
Backend / APIs: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)
Database / ORM: PostgreSQL, SQLite, Prisma ORM
AI / ML: AI and ML Fundamentals, Generative AI, Prompt Engineering, BERT and SHAP (research poster)
Developer Tools: Git, GitHub, Cursor AI, GitHub Copilot, Claude Code, Model Context Protocol (MCP)
Data / Design: Tableau, Canva (coursework)

PROJECTS

VendorBridge ERP – Procurement and Vendor Management SaaS GitHub Repository

Tech Stack: *React 19, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL / SQLite, Prisma ORM, JWT*

- Built a full-stack web application for the procurement lifecycle: vendor management, RFQs, quotation comparison, approvals, purchase orders, invoices, audit logs and dashboards.
- Implemented JWT and refresh-token authentication with RBAC across four roles (Admin, Procurement Officer, Vendor, Manager); designed Prisma data models on PostgreSQL / SQLite with seed data.

Smart Yatri – Travel and Crowd Prediction Platform

- Designed a travel-planning platform for destination discovery, crowd-level and visitor-density information, and suggestions for less-crowded visiting times based on historical and time-based trends.
- Included ticket-booking functionality; led the team and showcased the project at LJ Innovation Village 2026.

Phone Price Comparison Web Application

- Developed a web application that compares smartphones side by side on price and technical specifications to help users choose a suitable device.

ACHIEVEMENTS / EXPERIENCE

Python Developer Intern – CodeSprint Labs

- Completed a one-month Winter Internship as a Python Developer.
- **2nd Position, Smart India Hackathon (Internal Hackathon, LJCCA) –** team placed second; second SIH participation.
- **Team Leader, LJ Innovation Village –** led the team and presented the Smart Yatri project.
- **Research Poster Presenter, ICMOTARSS –** "Trustworthy Fake News Detection on FakeNewsNet Using BERT, SHAP and Social Context Analysis".
- **Coordinator, AI-Powered Creators Bootcamp (LJCCA) –** recognized for successful coordination.
- **Participant –** Laravel Web Application Development FDP (LJCCA); IoT Tech Talk: The Kickoff (NistantriTech).

CERTIFICATIONS

- **Google AI Professional Certificate (7 Courses) –** Google, via Coursera
- **AI and Machine Learning Essentials with Python (Specialization, 3 Courses) –** University of Pennsylvania, via Coursera
- **Vibe Coding Essentials: Build Apps with AI (Specialization, 5 Courses) –** Scrimba, via Coursera
- **Generative AI for UI/UX Design (Specialization, 3 Courses) –** IBM Skills Network and SkillUp, via Coursera
- **Foundation of AI and Machine Learning –** Microsoft
- **Fundamentals of Visualization with Tableau –** UC Davis, via Coursera
- **Pre-MBA Statistics –** IIM Ahmedabad
- **Introduction to Cybersecurity Essentials –** IBM
