Janvi Nankani

has successfully completed the online Specialization

Generative AI for UI UX Design

The certificate holder can use generative AI in UX/UI workflows to accelerate ideation, automate prototyping, personalize user experiences, and improve usability testing. They have a strong grasp of AI fundamentals, real-world application across multiple domains, and the role of prompt engineering in creating high-quality, design-focused outputs. They can design innovative solutions, build dynamic prototypes, apply AI-driven personalization, and refine usability with testing insights using generative AI. Through hands-on labs and projects, they've demonstrated job-ready skills in integrating AI into design processes, streamlining workflows, generating creative variations, and staying ahead in the evolving UX/UI field.
