4 Courses

Artificial Intelligence Essentials

Statistics for Data Science Essentials

Machine Learning Essentials

Deep Learning Essentials

Apr 13, 2026

Janvi Nankani

has successfully completed the online, non-credit Specialization

AI and Machine Learning Essentials with Python

This specialization will prepare learners to enter the exciting fields of artificial intelligence (AI) and machine learning. Across four courses, learners will familiarize themselves with AI, machine learning and deep learning essentials, while also gaining experience with statistics–the backbone of any machine learning problem. Learners will use Python to write programs that accomplish basic AI and machine learning tasks. By the end of this specialization, learners will be able to confidently use and discuss AI and machine learning tools and concepts, improve their Python skills, and be primed for more advanced study in these fields.

Chris Callison-Burch
Associate Professor
Computer & Information Science
University of Pennsylvania

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
